SUMMARY

Project Manager and Swedish Institute Scholar (2025) currently pursuing a Master's in Strategic Information Systems Management at Stockholm University (2025-2027). I specialise in leading data, AI, and technology-driven projects bridging structured project delivery with hands-on expertise in machine learning, data science, data engineering pipelines, and business intelligence. With 6+ years of experience managing complex, multinational projects - including European Commission-funded initiatives, I bring a proven ability to coordinate cross-functional teams, manage data lifecycles, and deliver results in high-stakes environments. Actively seeking Project Manager or technical PM roles in Sweden within IT, data, AI, and information systems

EXPERIENCE

Project Manager

Brighter Smiles International

01/2023 - Present

- Led development and optimisation of project management processes for EU Commission-funded initiatives, including the Erasmus+ EVETTI project across 9 partner organisations (Uganda, Norway, Sweden, Netherlands)
- Designed and maintained Excel and digital reporting systems to track project performance, resource allocation, and KPIs across multinational teams
- Coordinated data collection and built monitoring & evaluation dashboards to support real-time decision-making
- Structured data and information flows between partner organisations using digital tools and information systems
- Supported development of a web-based platform for greenhouse gas emissions data measurement
- Wrote and secured grants to fund strategic projects, ensuring alignment with organisational goals and EU funding requirements

Co-founder & Project Manager

Ecopentist Limited

01/2022 - Present

- Co-founded an environmental sustainability venture focused on coordinating climate action projects and reporting
- Managed project planning, stakeholder coordination, and delivery of environmental data initiatives
- Applied sustainability reporting frameworks aligned with UN SDGs and climate accountability standards

Technical Project Coordinator

Curiato Inc

09/2018 - 10/2021

- Coordinated a cross-functional team developing a data-driven healthcare monitoring solution (Smart Mattress) using IoT sensor data and machine learning analytics
- Worked closely with data scientists and engineers on data collection, data labelling, and preparation of datasets for ML model training
- Supported data engineering pipelines from raw sensor data capture to structured datasets used for analysis and modelling
- Collaborated in defining data requirements, validation rules, and quality checks to ensure reliable model inputs
- Participated in testing and evaluation of trained ML models by reviewing outputs and validating expected behaviour
- Used Power BI, Excel, and database systems to visualise and report device performance data
- Supported Agile/Scrum workflows by tracking data-related tasks, bugs, and improvements through structured backlogs

Project Management Intern

Makueni County Government

2017 - 2018

- Collected, organised, and analysed field data from farmers and trial sites to produce research and performance reports for agricultural projects
- Maintained structured records of farm validation data, prepared statistical summaries, and presented findings in stakeholder meetings

Mendix Rapid Developer Certification

Mendix

KEY ACHIEVEMENTS

Led EU Initiatives

Managed EU projects across 9 countries, enhancing cross-functional team efficiency using digital systems.

Founded Ecopentist Limited

Co-founded company, leading climate projects using sustainability frameworks aligning with UN SDGs.

Innovated Healthcare Solutions

Successfully coordinated IoT-driven solution development, optimizing data collection for innovative healthcare monitoring.

Secured Funding Grants

Wrote and secured multiple grants, aligning strategic project funding with European Union requirements.

EDUCATION

Master's - Strategic Information Systems Management

Stockholm University

08/2025 - 06/2027

- Designed and delivered an end-to-end Business Intelligence solution, from business requirements and data modelling to ETL, data warehousing, OLAP, and Power BI dashboards.
- Applied AI techniques to Business Process Management (BPM) to analyse and improve organisational processes.
- Conducted Object-Centric Process Mining (OCPM) to discover, analyse, and optimise complex business processes.
- Designed and implemented a data warehouse, developing ETL pipelines, dimensional models, OLAP solutions, and business intelligence dashboards.
- Developed an enterprise application using the Mendix low-code platform from design to deployment, earning the Mendix Rapid Developer Certification.
- Used qualitative and quantitative methods to explore information systems issues and aid evidence-based decisions.

BSc. Project Planning and Management

Moi University

10/2013 - 12/2018

- Focused on project planning, scheduling, monitoring, and evaluation using industry-standard project management methodologies.
- Developed skills in project budgeting, risk management, stakeholder engagement, procurement, and resource planning.
- Applied research, data analysis, and strategic planning techniques to design, implement, and evaluate development and business projects.
